Dear Mr Newberg 1/13/92

You and your wife Dilian, invited me to dinner in your home on April 28, '88. We discussed the assassination of John F. Kennedy at some length. You were most enlightening.

Last December I phoned into a DC area evening talk show (WAMU-88.5FM) and suggested those persons interested in the murder of M.L. King Jr read your book on the subject. I respect your opinion very much. "Whitewash" was excellent reading and holds up well with time. I still consult it often.

I have read with dismay your recent public comments on the Oliver Stone film "JFK". Please do yourself a favor and go see this film on the big screen while you still can. The film is an outstanding survey of facts and theories that point conclusively to a conspiracy and cover-up.

The torch has been passed, once again, to another artist seeking the truth to this most intriguing mystery. Oliver Stone

hoe alerted many to the same horrifying conspiracy that you yourself proclaimed since 1965.

May your future efforts as the "dean" of Kennedy assassination researchers be rewarding to you and the country we love.

Sincerely
Robert L. Wright
